ZIA AKHTAR

Flutter Developer | Dart | Firebase | Cross-Platform Mobile App Development (iOS & Android)

Pakistan | +92 306-1264822 | ziaakhtar223sa@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

IBM-certified Flutter and Dart developer with 5 production-style cross-platform apps published on GitHub, built with Firebase Authentication, Cloud Firestore, Provider state management and a clean layered architecture (Screens > Provider > Services > Firebase). Experienced in responsive UI, reusable widgets, named routing, animations, device location and secure checkout flows. Completed a Flutter internship at Codomax Digital Solutions and previously delivered 11+ websites as a freelance WordPress developer. Final-year BS Software Engineering student seeking a Flutter Developer role.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Cross-Platform Development (Android & iOS), Material Design, Responsive UI, Custom and Reusable Widgets, Stateless and Stateful Widgets, Widget Lifecycle (initState, build, dispose), ListView.builder, Layouts (Row, Column, Stack, Container)

State Management: Provider, setState

Backend and Data: Firebase Authentication, Google Sign-In, Cloud Firestore, Firestore Queries, Batch Writes, CRUD Operations, SQL

Navigation and UX: Named Routing, Multi-Screen Navigation, Form Validation, Hero Animations, Lottie Animations, Splash Screens, Error Handling

Device Features: Geolocator, Reverse Geocoding, Runtime Permissions

Architecture and Tools: Clean Architecture, Service Classes, Git, GitHub, Version Control

Web: WordPress, Elementor, WooCommerce

Soft Skills: Team Leadership, Management, Communication, Fast Learner, Attention to Detail

EXPERIENCE

Flutter Developer Intern | Codomax Digital Solutions **2026**

- Built an Expense Tracker app in Flutter using Provider state management and Cloud Firestore to store and sync expenses in real time.
- Implemented add-expense form with title, amount and category, swipe-to-delete, a live total, and animated category icons.
- Designed a clean data model and simple state logic that keeps the UI and database consistent.

Flutter Developer (Self-Directed Projects) | Independent **2026 – Present**

- Designed, built and published 5 Flutter apps on GitHub covering e-commerce, recipes, task management, expense tracking and weather.
- Integrated Firebase Authentication and Cloud Firestore for user accounts and live data across apps.
- Applied clean architecture, named routing and reusable widgets to keep each codebase easy to maintain and extend.

WordPress Developer | Freelance **1 Year**

- Delivered 11+ websites using custom themes, Elementor and WooCommerce.
- Improved page speed and Core Web Vitals; handled backups, updates and security hardening.

PROJECTS

ShopEase – Full E-Commerce App | Flutter, Dart, Firebase Auth, Cloud Firestore, Provider, Geolocator | GitHub

- Built a complete shopping app from sign-up to placed order, with an animated splash and a welcome animation after login.
- **Authentication:** Email/password and Google Sign-In, with clear colour-coded errors for weak password, email already in use, invalid credentials, no internet and too many attempts. User data is saved to Firestore only after successful registration.
- **Shopping:** Home screen loads live products from Firestore; dynamic category chips filter products with Firestore queries; categories screen, wishlist and product detail page with image slider, dot indicators and Hero animation.
- **Device hardware:** Detects the delivery location with Geolocator and reverse geocoding, handling every permission case (denied, denied forever, location turned off).
- **Cart and checkout:** Per-user cart stored in Firestore and managed with Provider, with a live cart badge in the bottom navigation bar. Checkout auto-fills the delivery address, validates input and shows an order summary.
- **Reliable orders:** Creates the order and clears the cart in a single batch write, so an order is never half-saved; shows a confirmation screen with an order number.
- **Architecture:** Screens > Provider > Services > Firebase, central named routes (AppRoutes), reusable widgets and service classes.

Recipe App | Flutter, Dart, Firebase, Navigation | GitHub

- Developed a cross-platform recipe app where recipes, categories and favorites are stored in and loaded from Firebase.
- Home feed with Breakfast, Lunch and Dinner categories and horizontally scrolling Quick and Easy cards showing calories and cooking time.
- Search and filters by preparation time, dietary needs and ingredients.
- Recipe details screen with images, serving size, ingredient checklist and step-by-step instructions.
- Favorites and Meal Plan tabs, plus a form for users to create and save their own recipes.

Todo App | Flutter, Dart, Firebase, Custom Widgets, Animations | GitHub

- Built a premium dark and gold task manager with an animated splash screen (logo, fade and progress bar) and multi-screen navigation.
- Add Task form with input validation; tasks are saved in Firebase.
- Swipe-to-delete with undo, category filters (Personal, Study, Work) and a progress card that tracks completed tasks.
- Friendly empty state, custom widgets, cards and image assets for a consistent look.

Expense Tracker | Flutter, Dart, Provider, Cloud Firestore | GitHub

- Created an expense tracker during the Codomax Digital Solutions internship.
- Users add expenses with title, amount and category; amounts are shown in PKR and the total updates live as items are added or removed.
- Swipe-to-delete, animated category icons, clean data model and simple Provider state logic backed by Cloud Firestore.

Weather App | Flutter, Dart, Custom UI | GitHub

- Designed a bright, glass-style weather screen with a custom-drawn sun, large temperature and sky condition for the selected city.
- Detail cards for humidity, wind speed, sunrise and sunset with a soft gradient interface.

EDUCATION

Bachelor of Science in Software Engineering (BSSE) | Nazeer Hussain University **8th Semester (Final Year)**

Intermediate, Pre-Engineering | Bufferzone Degree College

Pre-Engineering | Metropolis Academy

CERTIFICATIONS

- **Flutter and Dart: Developing iOS, Android, and Mobile Apps** | IBM (Coursera) | Aug 2026 | Verify: coursera.org/verify/OWNJ90A4BKU4
- **Flutter Internship** | Codomax Digital Solutions | Certificate in progress
